

ABSTRACT OF THE DISCLOSURE

The network facsimile apparatus is able to communicate using both a public switched telephone network and a computer network, and has a facsimile section which transmits and receives an image via the public switched telephone network, a mail section which transmits and receives an e-mail via the computer network, a web server which transmits a reply to a client in response to a request from the client that is connected to said network apparatus via said computer network, a storage which is to store received, and a list generating section which generates a structured document of reception list. When the web server receives an operation request concerning a reception list from a client, the web server provides the received operation request to the list generating section.
